Abstract

Background: Scientific publishing is fundamental to advancing knowledge, strengthening evidence-based practice, and translating research into meaningful societal impact. Nevertheless, researchers continue to encounter barriers involving accessibility, publication efficiency, editorial transparency, and equitable opportunities.

Objective: This inaugural editorial introduces Lumora Publishing House, outlines its founding principles, and establishes a commitment to authors, reviewers, editors, and the international scientific community.

Message: Lumora seeks to develop a publishing environment founded on scientific integrity, rigorous editorial evaluation, responsible innovation, accessibility, and constructive collaboration. By supporting researchers across disciplines and career stages, the publisher aims to promote credible scholarship and facilitate the dissemination of meaningful scientific contributions.

Conclusion: Scientific progress depends on trust, collaboration, and the responsible communication of knowledge. Lumora invites researchers worldwide to contribute to a publishing community dedicated to quality, transparency, and lasting scientific impact.

Keywords: Scientific Publishing; Research Integrity; Scholarly Communication; Open Access; Editorial Excellence; Research Innovation; Lumora Publishing House

Letter

Dear Authors, Researchers, and Colleagues,

It is with great pleasure that I welcome you to Lumora Publishing House.

The establishment of Lumora represents more than the introduction of a new scientific publisher. It reflects a commitment to building a scholarly environment where knowledge is respected, scientific contributions are valued, and researchers are empowered to advance their disciplines.

We believe that every meaningful discovery deserves rigorous evaluation, responsible dissemination, and an opportunity to contribute to scientific progress. Our ambition is to support authors through transparent editorial processes, constructive scientific assessment, accessible publishing opportunities, and continuous innovation.

Scientific excellence must remain our foundation. Publication speed should never compromise research integrity, methodological rigor, ethical standards, or the reliability of published evidence. Equally, unnecessary complexity should never prevent valuable research from reaching its intended audience.

At Lumora, we envision a collaborative international community connecting authors, reviewers, editors, institutions, and readers through shared principles of professionalism, accountability, and academic excellence.

As we begin this journey in 2025, I extend my sincere appreciation to every researcher who places trust in our vision. Your ideas, discoveries, and dedication will shape the future of this publishing house.

Together, we aspire to make scientific publishing more accessible, efficient, transparent, and impactful.

Let us advance knowledge, strengthen scientific trust, and create a lasting contribution to future generations.

With sincere appreciation,

Abdulsalam Mohammed Aleid
Founder, Lumora Publishing House
